

DeutschWeg — Fulfillment Explanation

Prepared for Lemon Squeezy merchant review

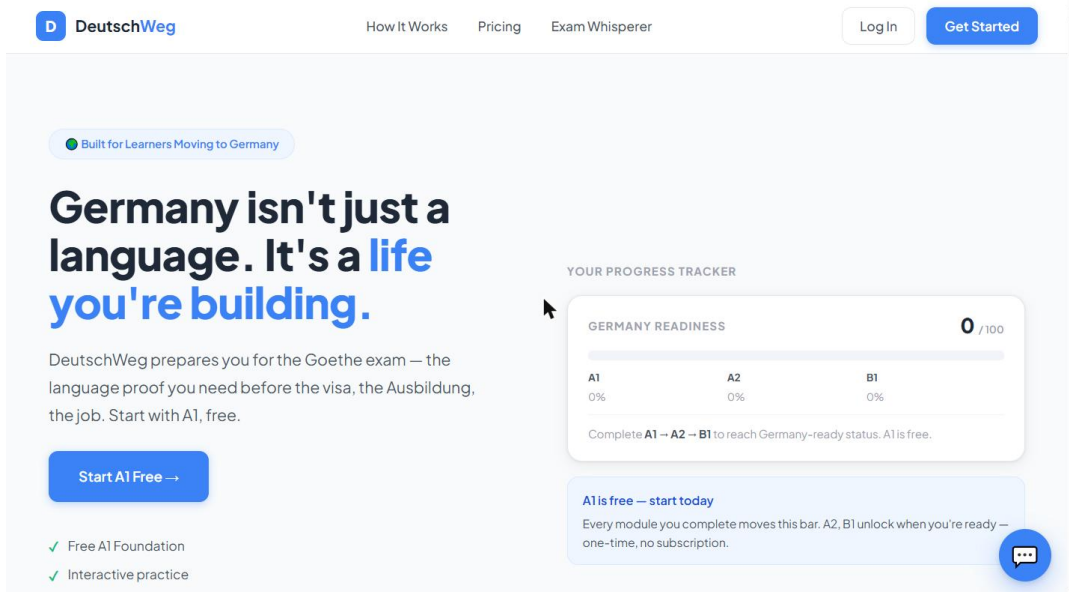

DeutschWeg (deutschweg.de) is an online course that prepares learners for the Goethe German-language exam, aimed primarily at people preparing to move to Germany for study, work, or family reunification.

This document walks through exactly what a customer experiences from the moment they sign up to the moment a paid tier is unlocked, in order to demonstrate how digital fulfillment works on this site. The screenshots below were captured end-to-end using a freshly created test account, in the order a real customer would encounter them.

How fulfillment works, in short:

1. A visitor creates a free account (no payment required).
2. The account is instantly provisioned with full access to the A1 course tier — 13 interactive modules, an AI tutor, and progress tracking — at no cost.
3. From the dashboard, the learner can see additional course tiers (A2, B1, B2), each clearly marked as locked and priced as a one-time purchase.
4. Tapping a locked tier opens an unlock/checkout summary screen showing exactly what is included, the one-time price, and a "Secure checkout via Lemon Squeezy" notice.
5. Completing checkout through Lemon Squeezy instantly unlocks that tier's modules on the same account — no separate download, shipping, or manual step is required. Fulfillment is immediate and automatic.

Step 1 — Marketing / landing page

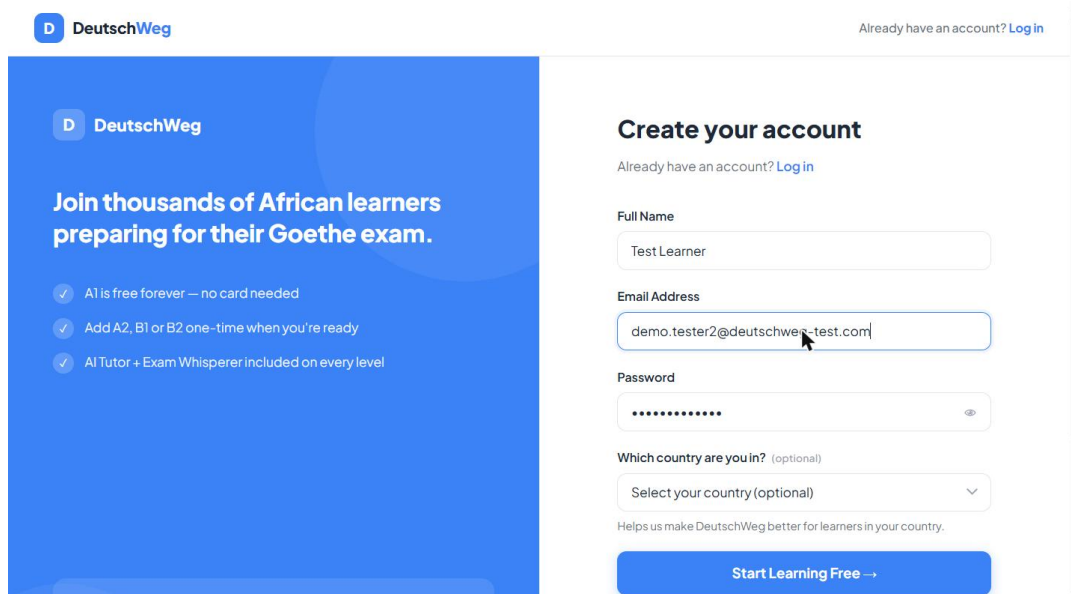

A prospective learner arrives at deutschweg.de. The homepage explains the product and offers a free path to start ("Start A1 Free") alongside a "Get Started" signup button in the top navigation.

Step 2 — Account creation form

The screenshot shows the account creation form on DeutschWeg. The left side has a blue background with the headline 'Join thousands of African learners preparing for their Goethe exam.' and three bullet points: 'A1 is free forever — no card needed', 'Add A2, B1 or B2 one-time when you're ready', and 'AI Tutor + Exam Whisperer included on every level'. The right side is the 'Create your account' form, which includes fields for 'Full Name' (with example 'e.g. Kwame Mensah'), 'Email Address' (with example 'kwame@example.com'), and 'Password' (with a requirement of 'At least 8 characters'). There's an optional dropdown for 'Which country are you in?' and a 'Start Learning Free' button at the bottom.

Clicking "Get Started" opens the signup form. Only a name, email address, and password are required. No payment information is requested at signup — the free tier truly requires no card.

Step 3 — Form completed

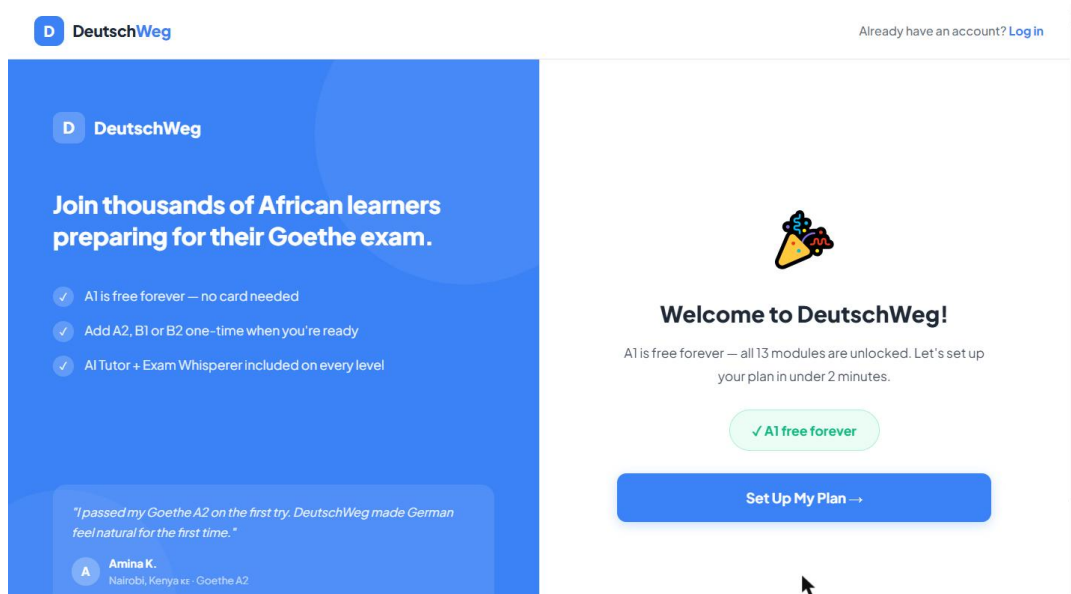

The screenshot shows the DeutschWeg account creation page. On the left, a blue sidebar contains the DeutschWeg logo and promotional text: "Join thousands of African learners preparing for their Goethe exam." Below this, three bullet points list benefits: "A1 is free forever — no card needed", "Add A2, B1 or B2 one-time when you're ready", and "AI Tutor + Exam Whisperer included on every level". At the bottom of the sidebar is a testimonial from Amina K. from Nairobi, Kenya, who passed her Goethe A2 exam on the first try.

The main content area on the right is titled "Create your account". It includes a link "Already have an account? Log in". The form fields are: "Full Name" (filled with "Test Learner"), "Email Address" (filled with "demo.tester2@deutschweg-test.com"), "Password" (filled with "*****"), and "Which country are you in? (optional)" (a dropdown menu with "Select your country (optional)" selected). A "Start Learning Free →" button is at the bottom right.

A test account is filled in (name, email, password) ready for submission.

Step 4 — Instant confirmation

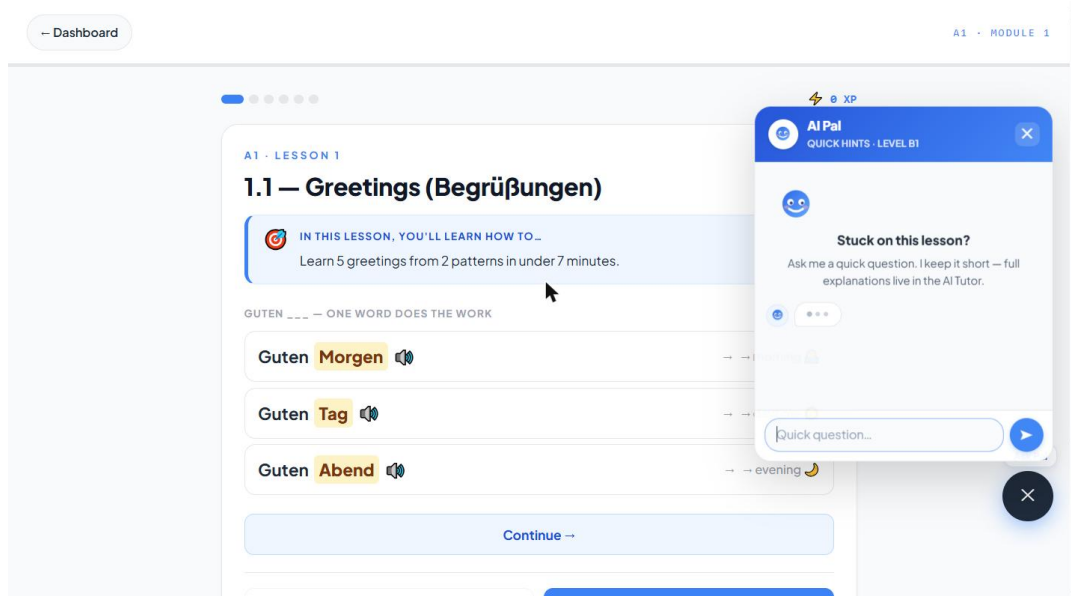

The screenshot shows the DeutschWeg instant confirmation screen. The left sidebar is identical to the previous step, but it also includes a testimonial from Amina K. from Nairobi, Kenya, who passed her Goethe A2 exam on the first try.

The main content area on the right is titled "Welcome to DeutschWeg!". It features a colorful ice cream cone icon. Below the icon, the text reads: "A1 is free forever — all 13 modules are unlocked. Let's set up your plan in under 2 minutes." There are two buttons: a green "✓ A1 free forever" button and a blue "Set Up My Plan →" button.

Immediately after submitting the form, the account is created and the customer is shown a confirmation screen: "Welcome to DeutschWeg! A1 is free forever — all 13 modules are unlocked." This confirms that free-tier fulfillment (account + content access) is instantaneous.

Step 5 — Real course content, unlocked and interactive

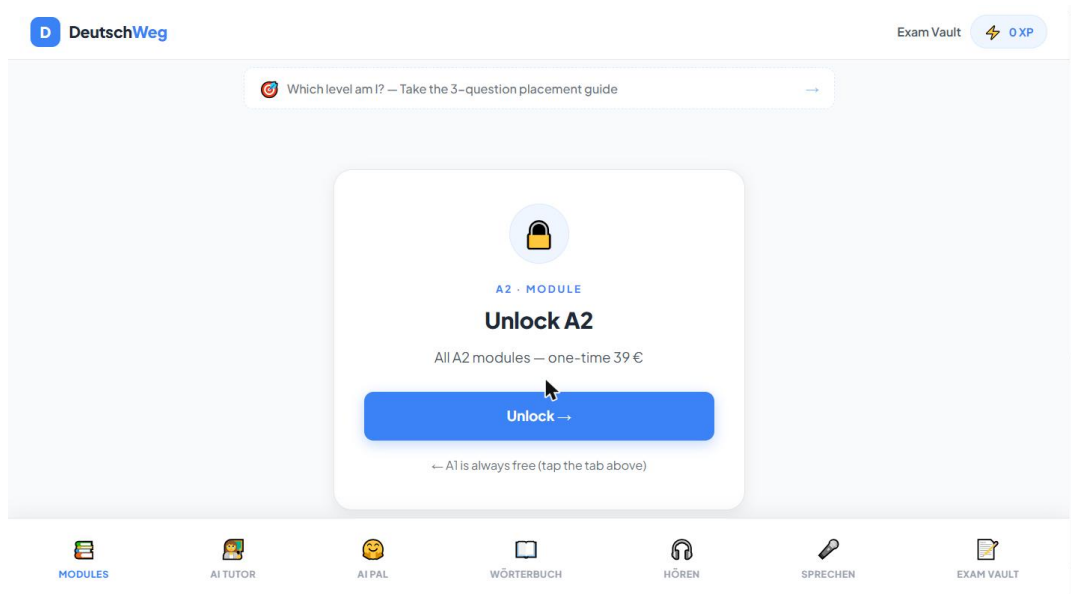

After a short onboarding flow, the learner lands inside actual paid-quality course content: Module 1, Lesson 1.1 ("Greetings"), with interactive vocabulary, audio playback, comprehension checks, and an AI tutor ("AI Pal") panel that responds by name. This is delivered entirely in-browser with no additional download.

Step 6 — Dashboard showing free vs. paid tiers

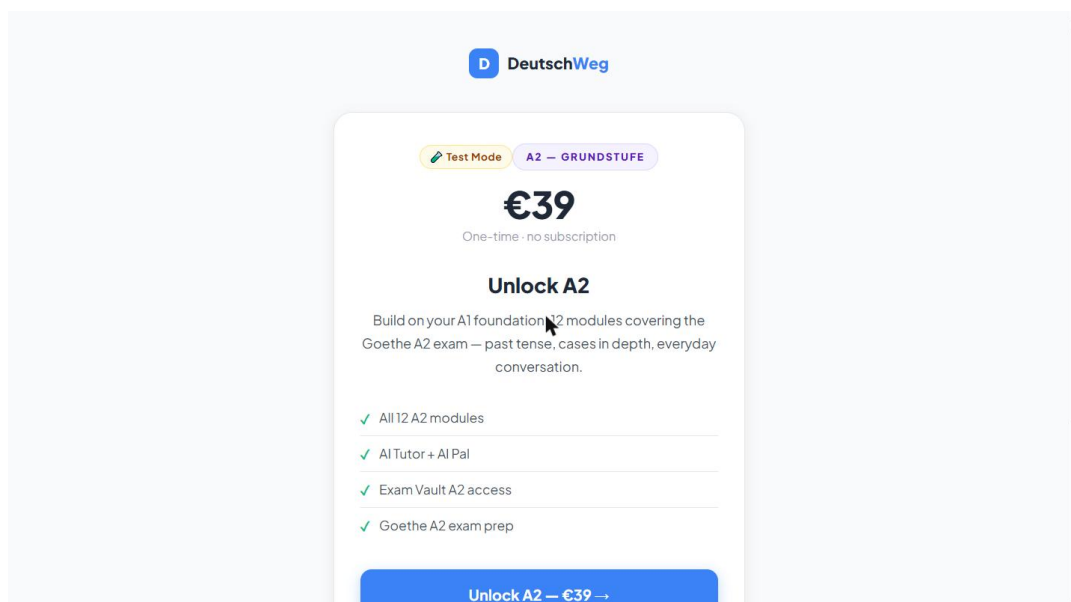

Back on the main dashboard, the learner can see the full course structure: the A1 tier they already have access to, and three additional tiers — A2 (€39), B1 (€44), and B2 (€49) — each shown with a lock icon and its one-time price. Nothing is hidden or ambiguous about what costs money.

Step 7 — Locked-module screen

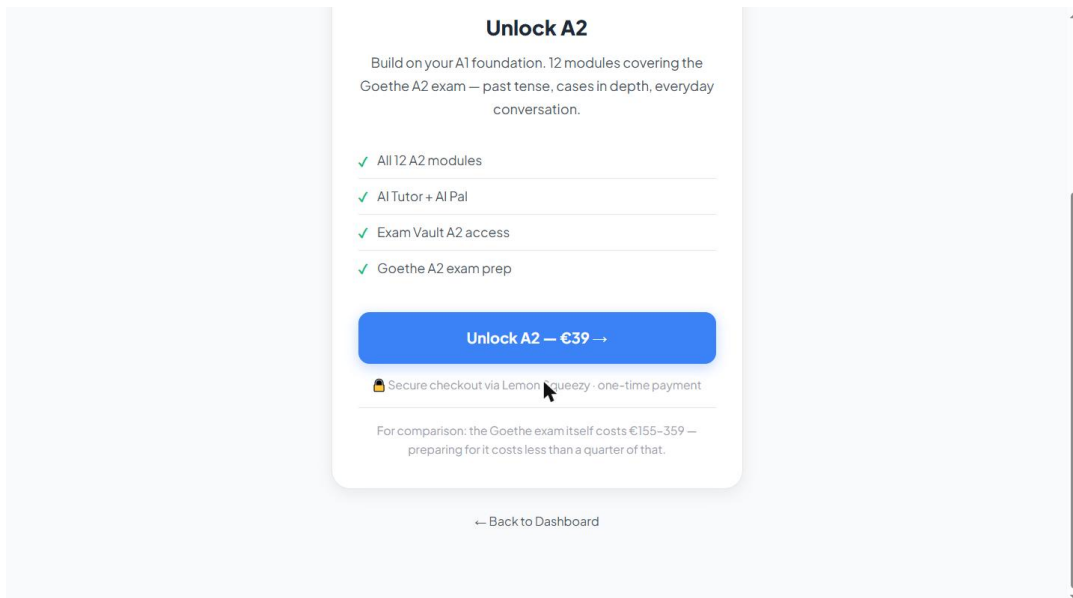

Tapping the A2 tab (a paid, not-yet-purchased tier) shows a clear "Unlock A2" screen stating the one-time price (€39) and a single "Unlock →" call to action. The learner cannot access A2 lesson content until this purchase is completed.

Step 8 — Purchase summary before checkout

Tapping "Unlock" opens a purchase summary: price (€39, one-time, no subscription), what's included (all 12 A2 modules, AI Tutor + AI Pal, Exam Vault A2 access, Goethe A2 exam prep), and a "Unlock A2 — €39" button that proceeds to checkout.

Step 9 — Lemon Squeezy checkout hand-off

Directly beneath the purchase button, the page states "Secure checkout via Lemon Squeezy · one-time payment." Selecting this button opens Lemon Squeezy's own hosted checkout (shown here in Test Mode) to collect payment. On successful payment, Lemon Squeezy's webhook flips the corresponding tier to "unlocked" on the customer's DeutschWeg account, and the purchased modules become immediately available — the same instant, automatic fulfillment already demonstrated for the free A1 tier in Step 4.

Summary

DeutschWeg delivers a purely digital product: interactive lesson content, AI tutoring, and exam-preparation tools accessed directly in the browser on the customer's own account. There is no physical shipping, no manual provisioning step, and no delay between payment and access — fulfillment for both the free A1 tier and each paid tier (A2, B1, B2) happens automatically and immediately once the corresponding step (signup, or checkout via Lemon Squeezy) completes.
